Technical Skills

Languages: C, Python, SQL, JavaScript, TypeScript, HTML/CSS, Java, R, Assembly

Frameworks: React, Node.js, Next.js, TailwindCSS, Firebase, Swing, JUnit, JQuery

Developer Tools: Git, Docker, Github, VS Code, Visual Studio, Makefile

Projects

Tennis Locator | *Next.js, React, TypeScript, Firebase* [Website](#)

July 2024 - Present

- Developing a **full-stack app** for real-time tennis court searches with an **AI-powered chatbot** and a responsive **UI** using **Tailwind CSS**, **cutting-edge technologies**, and **modern web design principles**.
- Implemented **Firebase Authentication** with social login and **Firestore** for secure user management and real-time updates, ensuring an **efficient and effective experience**.
- Optimized performance with **ReactJS**, **React Router**, and **Next.js**, reducing page load times by **35%** and streamlining deployment.

Comand Line Stock Portfolio Management | *Java* [Github](#)

Dec 2024 - Present

- Developed a **terminal stock portfolio** built on **Linux server** using OOP principles like inheritance, polymorphism, and encapsulation, now **transitioning** it into a **web platform** with a responsive, component-based frontend.
- Building **RESTful APIs** and a **microservices backend** to support real-time stock data and accuracy by 30%.
- Integrating **PostgreSQL** for secure **data storage** and hosting on Vercel and Render for a reliable performance.

Me's Restaurant | *JavaScript, HTML/CSS* [Website](#)

July 2023

- **Created** a fully responsive **online menu**, ensuring easy access and user-friendly navigation. **Attracted over 20 customers**, boosted sales, and received positive feedback for its intuitive user experience.

Experience/Volunteer

Information Technology Support Specialist

May 2024 – August 2024

Fracht Group

Kampala, Uganda

- **Collaborated** with a **team of four** to set up and configure over **80 employee** workstations, reducing onboarding setup time by **15%** and demonstrating strong verbal communication skills.
- **Managed hardware and software inventory**, ensuring compliance with company policies and accurate asset tracking while juggling multiple job tasks.
- Provided **end-user support** for **local** and **remote** teams, resolving 90% of issues on the first attempt and minimizing downtime for less technical individuals.
- Improved troubleshooting workflows, **reducing** recurring **issues** by **20%** and **response times** by **30%**.

GDSC Hackathon

May 2024

University of Guelph

Guelph, ON

- **Contributed** as a staff member in a **3 day Hackathon** for over **200 participants**, leading a **hands-on workshop** to equip attendees with essential technical skills and enhance their competition readiness.

Education

Bachelor of Computing in Computer Science (Co-op), Minor in Geomatics

Guelph, ON, Canada

University of Guelph

Sept. 2023 – April 2028

- **Relevant Coursework:** Data Structure and Algorithm, Object Oriented Programming, Discrete Structure 1 & 2, Operating System, Microcomputers, Linear Algebra, Earth from Space
